Languages: HTML/CSS, Javascript
Libraries/Tools: Express, MySQL, MongoDB, Git, Node.js, React
Other: Heroku, Mongo Atlas, Postman, Netlify, Babel, Shopify, Troubleshooting issues with hardware and software, teaching and collaborating remotely

PROJECTS

Journey On | https://halowe94.github.io/JourneyOn/
This web application allows users to easily check the weather and forecast of their destination, find nearby restaurants, and translate English into their destination's language.
- Collaborated with a team of 3 to design UI, utilize APIs, and debug code
- Completed web application remotely utilizing Zoom, Slack and Github
- Front End Developer - employed Javascript to create ajax calls to multiple APIs, routing, and UX
- Navigated version control through VS Code, Git, and Github
- HTML/CSS, Javascript, APIs

Table of Continents | https://stark-stream-40899.herokuapp.com/
A full stack web application that utilizes express, sequelize, handlebars, and node to enable the user to toggle between web pages and learn few facts and popular dishes from each continent.
- Full Stack Developer - Coded middleware to connect front end and and back end, created file structure, added MySQL database
- Merged branches on github and facilitate meetings to ensure regular pulls/pushes
- Deployed application through Postman and Heroku
- Led team through troubleshooting and created solutions to unforeseen problems
- HTML/CSS, Javascript, APIs

Food Bank Finder | Deployment coming soon
This application allows the user to find the top three nearest Food Bank Locations and map to those locations.
- Applied Agile techniques to monitor completion of tasks within team
- Presented application to industry professionals to receive feedback for continued development
- Maximized use of newly learned library (React) by building components for index and about page
- Tested various map APIs and plugins for functionality within React components
- Formatted CSS for responsive web design
- HTML/CSS, Javascript, APIs
